REVIEW ARTICLE

Photosystem I core
by M.M. Margulies (Beltsville, MD) 1–13

PHYSIOLOGY AND BIOCHEMISTRY

Induction of α-amylase isoenzymes by gibberellic acid in imbibed rice half-seeds
by F. Panabieres, F. Karhardy, A. Montembault, J. Daussant and M. Delseny (Perpignan, Meudon and Strasbourg, France) 15–23

Distribution of enzymes catalyzing the glucosylation and sulfation steps of glucosinolate biosynthesis in *Brassica juncea* seedlings and cultured cells
by J.C. Jain, M.R. Michayluk, J.W.D. Grootwassink and E.W. Underhill (Saskatoon, Canada) 25–29

A wheat-germ nuclear fraction required for selective initiation in vitro confers processivity to wheat-germ RNA polymerase II
by L. De Mercoyrol, C. Job, S. Ackerman and D. Job (Marseille, France and Boston, MA) 31–38

Interaction of ethephon with cytokinin and gibberellin during the removal of apple seed dormancy and germination of embryos
by I. Sinska (Warsaw, Poland) 39–44

The effects of chloroplast envelope-Mg^{2+}, cation movement, and osmotic stress on photosynthesis
by P.A. Pier and G. A. Berkowitz (Brunswick, NJ) 45–53

Effect of rust infection on galactolipids and galactolipid fatty acids of *Vicia faba* chloroplasts
by R. Buonaurio, S. Passeri and G. Della Torre (Perugia, Italy) 55–60

Immunohistochemical localization of ascorbate oxidase in *Cucurbita pepo* medullosa
by G. Chichiricco, M.P. Ceru, A. D'Alessandro, A. Oratore and L. Avigliano (Aquilla, Italy) 61–66

GENETICS AND MOLECULAR BIOLOGY

Transformation and regeneration of *Nicotiana edwardsonii*
by J.M. Kiernan, K.-B. Goldberg, M.J. Young, J.E. Schoel and R.J. Shepherd (Lexington, KY) 67–78

Phytochrome control of the accumulation and rate of synthesis of ascorbate oxidase in mustard cotyledons
by L. Leaper and H.J. Newbury (Birmingham, U.K.) 79–90

Identification of an inhibitor of transcription in extracts prepared from wheat shoot nuclei
by R.D. Henfrey, L.M.F. Proudfoot, S.N. Covey and R.J. Slater (Hatfield, Norwich and Amersham, U.K.) 91–98

Expression of a synthetic gene for improved protein quality in transformed potato plants
by M.S. Yang, N.O. Espinoza, P.G. Nagpala, J.H. Dodds, F.F. White, K.L. Schnoor and J.M. Jaynes (Baton Rouge, LA, Manhattan, KS and Lima, Peru) 99–111

CELL AND TISSUE STUDIES IN VITRO

Patterns of phenotypic and tuber protein variation in plants derived from protoplasts of potato (*Solanum tuberosum* L. cv. Bintje)
by H.C.J. Burg, K. Sree Ramulu, G.M.M. Bredemeijer, S. Roest, P. Dijkhuis, J.J. van Hoogen and A. Houwing (Wageningen, The Netherlands) 113–124

Factors affecting the improvement of colony formation from sunflower protoplasts
by C. Chanabe, M. Burrus and G. Alibert (Toulouse, France) 125–132

Book Review 133–134

REVIEW ARTICLE

Amino acid biosynthesis and its regulation in cyanobacteria
by G. Riccardi, E. De Rossi and A. Milano (Pavia, Italy) 135–151

PHYSIOLOGY AND BIOCHEMISTRY

Specificity and seasonal variation of arginase, glutamate synthase and nitrate reductase activities in Scots pine needles
by M. Pietilä, P. Kuusipuro, P. Pietiläinen and P. Lähdesmäki (Oulu and Muhos, Finland) 153–160

Cytokinin translocation and metabolism in lupin species. II. New nucleotide metabolites of cytokinins
by D.S. Letham and R. Zhang (Canberra, Australia) 161–165

The effects of different cultural conditions on the accumulation of depot lipids notably petroselinic acid during somatic embryogenesis in *Daucus carota* L.
by P. Chandra Dutta and L.A.K. Appelqvist (Uppsala, Sweden) 167–177

The distribution of α-carotene in the photosynthetic pigment-protein complexes of higher plants
by A.J. Young and G. Britton (Liverpool, U.K.) 179–183

GENETICS AND MOLECULAR BIOLOGY

Molecular cloning and partial characterization of the gene for granule-bound starch synthase from a wildtype and an amylose-free potato (*Solanum tuberosum* L.)
by R.G.F. Visser, M. Hergersberg, F.R. Van Der Leij, E. Jacobsen, B. Witholt and W.J. Feenstra (Haren and Groningen, The Netherlands and Köln, F.R.G.) 185–192

CELL AND TISSUE STUDIES IN VITRO

Further characterization of somatic embryogenesis and plantlet regeneration in pecan (*Carya illinoensis*)
by H.Y. Wetzstein, J.R. Ault and S.A. Merkle (Athens, GA) 193–201

Isoenzyme analysis of cytokinin sensitive mutants of the moss *Physcomitrella patens*
by F. Ye, J. Gierlich, R. Reski, J.R. Marienfeld and W.O. Abel (Hamburg, F.R.G.) 203–212

The effects of colchicine on ploidy level, morphology and embryogenic capacity of alfalfa suspension cultures
by J. Doležel and P. Binarová (Olomouc, Czechoslovakia) 213–219

The respiration of protoplasts from leaves of barley infected by powdery mildew (*Erysiphe graminis*, f.sp. *hordei*)
by M.R. McAinsh, P.G. Ayres and A.M. Hetherington (Lancaster, U.K.) 221–230

Inhibitory effect of ammonium ion on recovery of cryopreserved rice cells
by A. Kuriyama, K. Watanabe, S. Ueno and H. Mitsuda (Kyoto, Japan) 231–235

In vitro regulation of gemma/bud formation by cytokinins in the moss *Bryum capillare* Hedw.
by Sarla and R.N. Chopra (Delhi, India) 237–242

Ethylene inhibitors enhanced de novo shoot regeneration from cotyledons of *Brassica campestris* ssp. *chinensis* (Chinese cabbage) in vitro
by G.-L. Chi and E.-C. Pua (Singapore, Republic of Singapore) 243–250

The effect of macroelements in the induction of embryogenic callus from immature embryos of wheat (*Triticum aestivum* L.)
by D.G. He, Y.M. Yang and K.J. Scott (St. Lucia, Australia) 251–258

GENERAL

Characterization and subcellular compartmentation of acid phosphatases in glyphosate-treated buckwheat cell cultures
by R. Vögeli-Lange, H. Holländer-Czytko and N. Amrhein (Bochum, F.R.G.) 259–266

Subject Index Volume 64 267–269

Author Index Volume 64 271–272

Contents Volume 64 273–274
